

INTRODUCTION

EVOstone is a waterproof, hygienic and easy to clean surface. The EVOstone surface is satin finish which has a slight reflective shine to the surface and like most materials require some care and maintenance to keep EVOstone performing and looking as good as the day it was installed. To do this, it starts with prevention.

PREVENTION

No solid surface material is immune to damage so preventing this is the best solution. Simple steps can be taken to help keep EVOstone look amazing. The following guidelines outline some step to do this:

- Never stand or place heavy objects or machinery on solid surface products.
- Use felt protectors under pottery or other hard standing objects, refrain from sliding hard or heavy objects across the surface.
- Avoid leaving hot appliances or utensils in direct contact with solid surface products
- Avoid strong chemical such as strong acid, paint removers, cleansers etc. to the surface. In case of contact, rinse the surface with water.
- Do not cut directly on the bench top
- Avoid using abrasive scouring pads for routine cleaning
- When cleaning towel dry to prevent watermarks

EVERYDAY SURFACE CLEANING

General daily cleaning is easy achieved using a non-scratch cloth and warm soapy water. Sugar soap can also be used for a deeper clean.

Vuplex cleaner is recommended to maintain the surface finish and is food safe. Use as needed.

STAINS AND LIGHT SCRATCHES

In most instances scuff marks are removed from daily cleaning. For persistent stains and light scratches which require a more thorough clean to remove use a mild abrasive cleanser and wipe down in a circular motion. After, rinse and wipe surface with a damp non scratch cloth. If surface is dulled use Vuplex cleaner to polish dulled surface.

DAMAGE TO SURFACE

In the event that your EVOstone surface has been damaged, your product unlike some other solid surface products can be repaired. Damage such as chips, large scratches and even cracks can be repaired on site.

In the instance that this occurs contact your supplier of EVOstone for assistance.

REVITALISING SURFACE

Over the years of use and enjoying the benefits of EVOstone product it may require a face lift. The surface can be completely restored to look like it was brand new again without the price of replacing. Your original supplier will be able to assist you.
